ASSEMBLY TABLE MT 1

Award-winning!
German industrial
safety prize

The tried and tested M1 assembly table is characterised by excellent flexibility: for example, the size of the work area can be adapted quickly to suit the work piece, and work pieces can be fixed vertically both comfortably and securely.

TECHNICAL DATA

Load capacity	400 kg
Lifting area	690-1260 mm
Length of work area	1600-3500 mm
Width of the work area	980-1900 mm

REMOVEABLE
FACE VISE

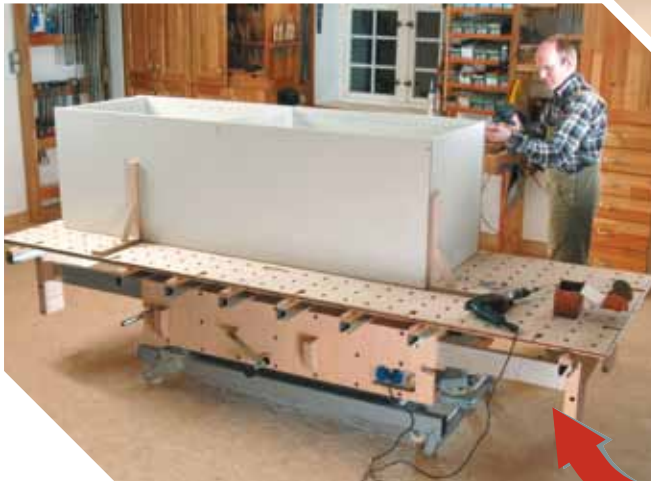

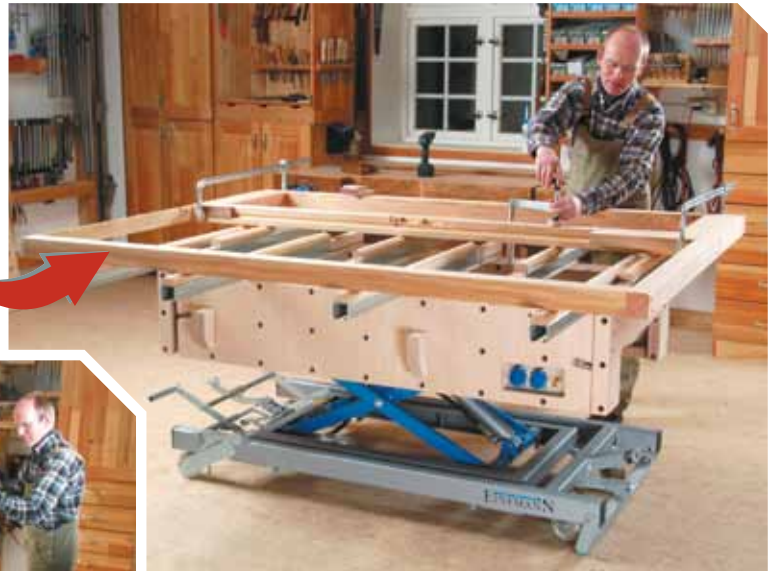

Even large work pieces can be fixed comfortably and securely with the help of the MT1 clamp.

In addition, the extensive range of accessories means that the table can be adapted to satisfy users' individual needs.

The height adjustment makes working more ergonomic, more enjoyable and less tiring. The module system means you can customise the assembly table to meet your requirements.

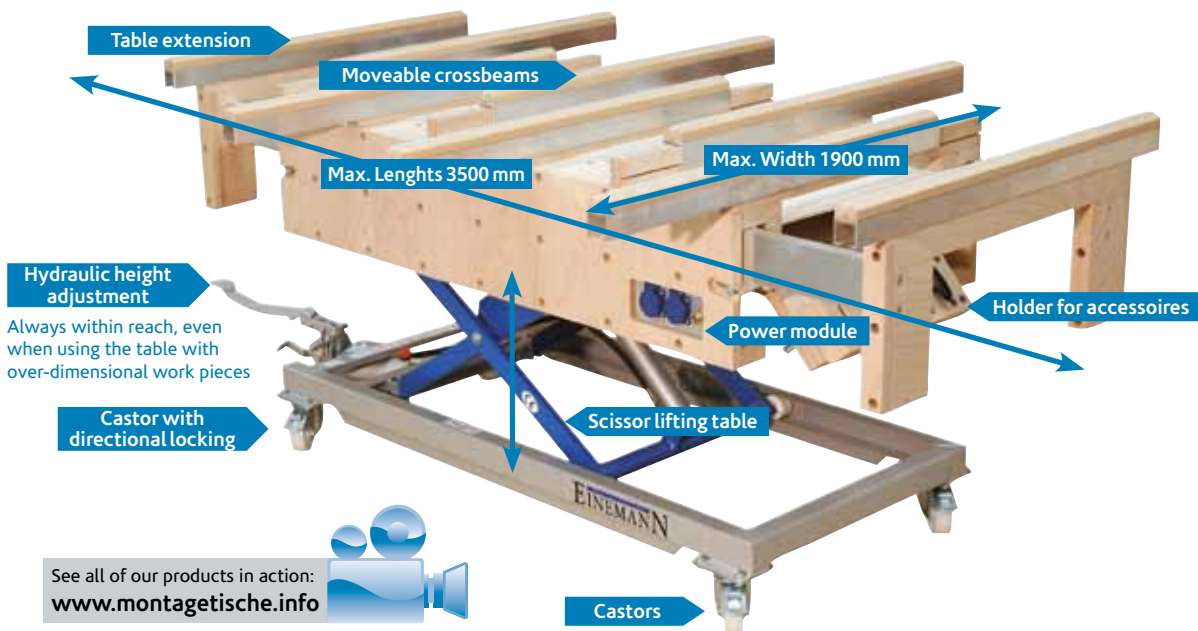

The crossbeams are covered with a soft overlay. This protects your work pieces from damage and slipping.

Both the width and the length of the crossbeams can be adjusted to fit the work piece.

Extra worktops with drilled holes are stored in the table and can be used on top of the crossbeams to create a flat work area.

This gives you a flexible and even work surface that is perfectly adjusted to the length and width of your work piece.

EQUIPMENT

VERSION A:

- Scissor lifting table
- MT 1 assembly table top
- 1 clamp

VERSION B:

- Scissor lifting table
- MT 1 assembly table top
- 1 clamp
- 5 worktops with drill holes
- 4 holding clamps

VERSION C:

- Scissor lifting table
- MT 1 assembly table top
- 1 clamp
- 5 worktops with drill holes
- 4 holding clamps
- 1 vise
- Power module

Additional accessories, such as the vacuum tightener and the swivel arm can be integrated or retrofitted.

ASSEMBLY TABLE MT 3

The MT 3 assembly table is a robust lifting assembly table featuring a 40mm-thick multiplex worktop.

This table will impress you with its length adjustment capability and its horizontal and vertical clamping options.

LOW DESIGN HEIGHT

The height adjustment allows you to work ergonomically. The sturdy pull-out device has 32mm-thick steel shafts.

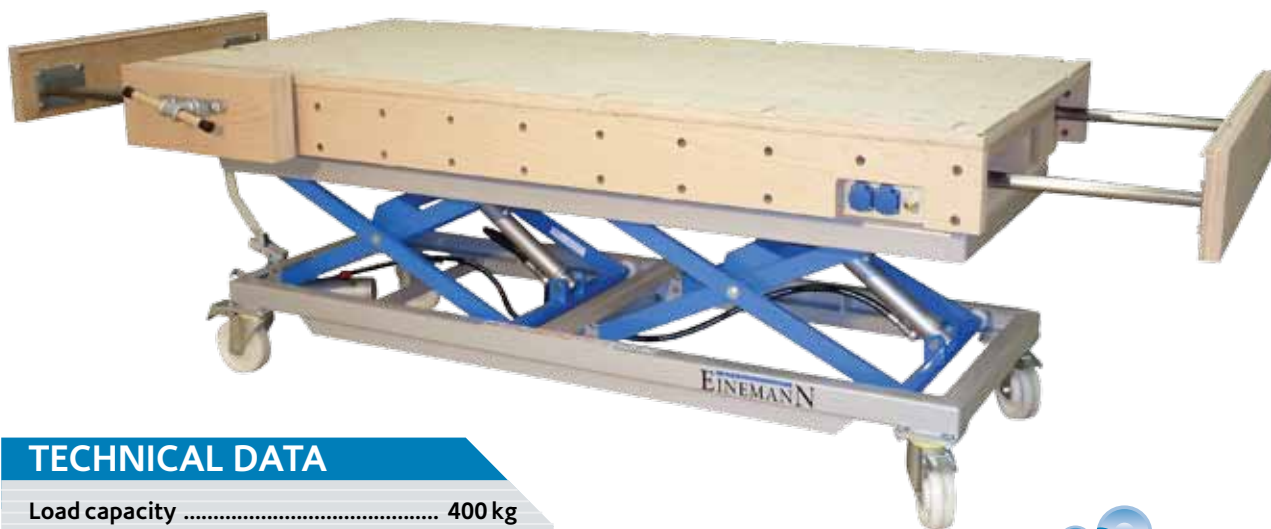

Supporting angles can be set laterally to widen the bearing surface. The face vise can be mounted lengthways or transversally.

This robust and flexible assembly table is also particularly well suited to use in training workshops.

TECHNICAL DATA

Load capacity.....	400 kg
Lifting area	585-1205 mm
Length of work area	1700-2780 mm
Width of work area	1000 mm

ASSEMBLY TABLE MT 3 XXL

TECHNICAL DATA

Load capacity	400 kg
Lifting area	585-1205 mm
Length of work area	2200-3280 mm
Width of work area	1000 mm

See all of our products in action:
www.montagetische.info

EQUIPMENT MT 3

VERSION A:

- Scissor lifting table
- MT 3 assembly table top without drill holes in the worktop
- 1 clamp

VERSION B:

- Scissor lifting table
- MT 3 assembly table top with drill holes
- 1 clamp
- 1 vise
- 4 bench hooks
- 1 power module

VERSION C:

- Scissor lifting table
- MT 3 assembly table top with drill holes
- 1 clamp
- 1 vise
- 4 bench hooks
- 1 power module
- Table extension on both sides + 2 extension panels

EQUIPMENT MT 3 XXL

VERSION A:

- The same as MT3 A but with
- MT3 XXL tandem scissor lifting table
 - MT 3 XXL assembly table top without drill holes

VERSION B:

- The same as MT3 B but with
- MT3 XXL tandem scissor lifting table
 - MT 3 XXL assembly table top with drill holes

VERSION C:

- The same as MT3 C but with
- MT3 XXL tandem scissor lifting table
 - MT 3 XXL assembly table top with drill holes

ASSEMBLY TABLE MT 4

The MT4 assembly table has a 40mm-thick beech multiplex worktop. All assembly tables and accessories can be combined individually

TECHNICAL DATA

Load capacity	500 kg
Lifting area	380-1000 mm
Size of work area	1600-1000 mm

LOW DESIGN HEIGHT

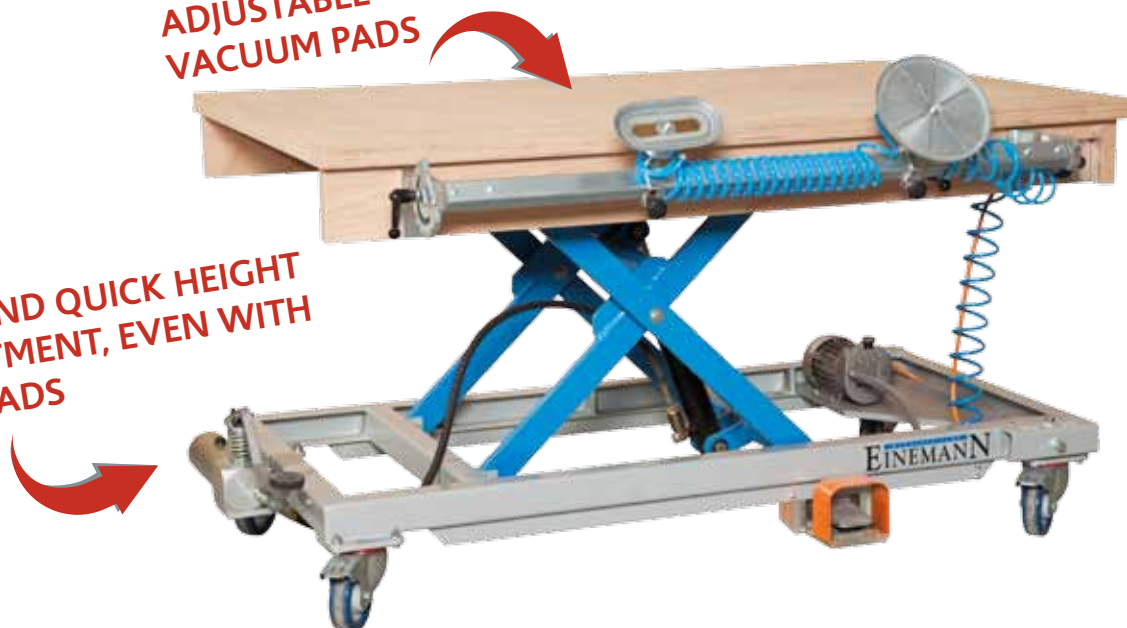

BIG LIFTING AREA

ADJUSTABLE VACUUM PADS

EASY AND QUICK HEIGHT ADJUSTMENT, EVEN WITH BIG LOADS

TOOL CLOSE TO HAND

...for an optimised workshop

BIG WORK AREA
1600 X 1000 mm

INTEGRATED VAKUUM

DIREKTIONAL LOCKING

ASSEMBLY TABLE MT 5

The MT5 assembly table features a 40mm-thick beech multiplex worktop and is equipped with a tandem lifting platform.

TECHNICAL DATA

Load capacity	500 kg
Lifting area	490-1080 mm
Size of work area	2200-1000 mm

MOBILE WORKBENCH MW

The MW mobile workbench is your multi-functional workshop aid. It completes the workshop, functioning as a tool store and a mount for Einemann workshop & assembly trolleys.

In addition, this workbench features a large variety of equipment options, for example a back board with holes, a rubbish bag holder and a power channel. If the workbench is fitted with the MSA swivel cantilever; this can be moved easily around the workshop.

www.montagetische.info

NEW

TECHNICAL DATA

Height	1100 mm
Depth	770 mm
Length	1100 mm / 1600 mm
Other dimensions available on request!	

The MW mobile workbench is available in two sizes: 1100 long for 2 trolleys and 1600mm long for 3 trolleys. Instead of trolleys, the mobile workbench can also be fitted with fixed drawer units.

**FLEXIBLE & VERSATILE FOR
 WORKSHOP & ASSEMBLY**

WORKSHOP & ASSEMBLY-TROLLEY

The Einemann workshop & assembly trolley is a moveable storage container on wheels, suitable for systainers, euroboxes and wooden boxes.

The sturdy telescopic handle makes it easy to manoeuvre.

In addition, the WMT workshop and assembly trolley has holders for spirit levels, cable reels and other assembly tools on the back.

NEW

The pull-out parts can be height adjusted or removed. The WMT can be stationed in the mobile workbench. Additional wheels give you mobility and make loading the unit into vehicles easier.

All equipments and dimensions detail at www.montagetische.info

EXAMPLES

■ Workshop and assembly trolley with systainers

■ Workshop and assembly trolley with euroboxes

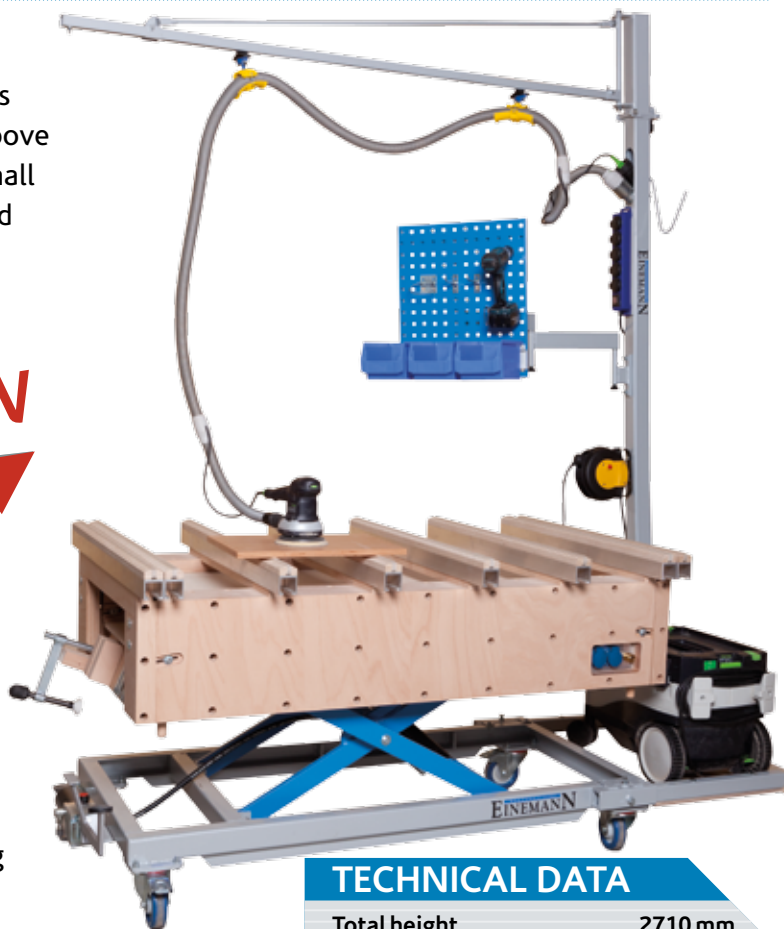

■ Workshop and assembly trolley with systainers

MULTI-SWIVEL CANTILEVER

The MSA multi-swivel cantilever allows you to make cables, vacuum hoses, tools and small materials available directly above the work station. All of the tools and small materials you need are close at hand and within comfortable reach.

NEW

The vacuum is positioned directly on a platform on the assembly table meaning that it is always where it is needed. Of course, the swivel cantilever can also be retrofitted to older assembly tables.

TECHNICAL DATA

Total height 2710 mm
 Reach 2000 mm
 Other dimensions available on request!

EQUIPMENT

VERSION A

- Swivel cantilever with pole (reach 2000mm)
- Swivel cantilever support
- Holder for swivel cantilever support
- 2 roller units with hose holder

VERSION B

- IN ADDITION TO A**
- PU vacuum hose with cone
 - 3m extension cable
 - Machine holder
 - Platform for vacuum

VERSION C

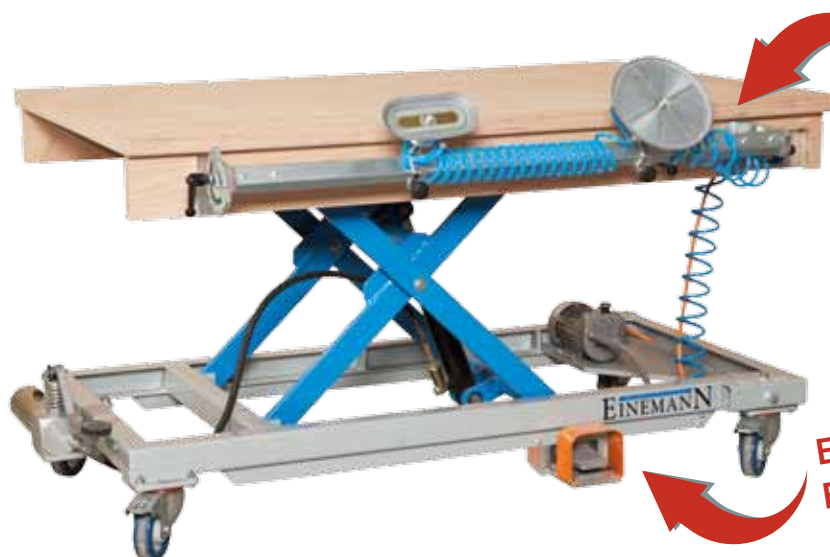

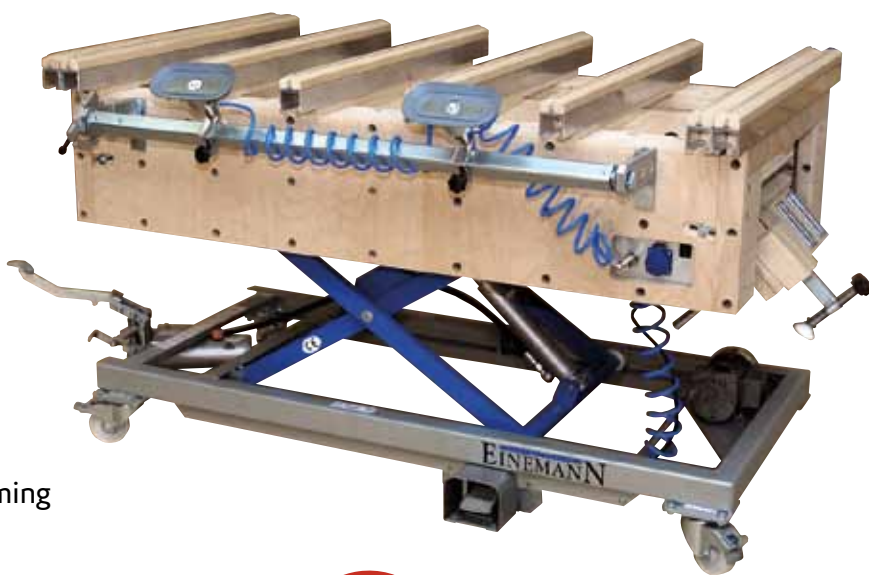

- IN ADDITION TO A AND B**
- Swivel arm with hole wall
 - 3 easy-access boxes
 - 1 easy-access box holder
 - 1 cable reel
- (without grinding device and plug-it pipe)

MT-VACUUM MODULE

The MT vacuum module can easily be mounted on all Einemann assembly tables or existing work tables or benches.

By combining this with the height-adjustable assembly table, the fixed work piece can be positioned with no effort at all.

Thanks to integrated push-button valves, you can secure work pieces automatically by means of suction, meaning you can avoid time-consuming manual clamping.

EASILY REMOVEABLE

See all of our products in action:
www.montagetische.info

EASY RELEASE USING FOOT CIRCUIT BREAKER

Flexible and easy securing of work pieces makes all-round ergonomic processing possible.

TECHNICAL DATA

Vacuum suction power 4,05 m³/h
Motor power 0,18 kW

EASY SUCTION THANKS TO PUSH-BUTTON VALVES

WORK PIECES CAN BE TILTED

THE MODERN WORK SPACE

**MOBILE,
FLEXIBLE,
ORGANISED!**

EINEMANN ASSEMBLY TABLES provide a completely new, ergonomic work area in your workshop. Their exceptional versatility helps you optimise your work processes and work more effectively.

Organisation, mobility and flexibility are key factors in meeting today's constantly changing demands.

You will find videos of all EINEMANN PRODUCTS in action on the internet!
